PROJECT PROFILE :-

Project: Meals App

Description: The Meals App is a mobile application built using Flutter, designed to help users explore meal categories, view detailed recipes, and manage favorites. The app is structured using modern development practices, including state management with the provider package and a modular, scalable architecture.

Technologies & Tools Used :-

- Framework: Flutter
- Language: Dart
- State Management: provider
- IDE/Editor: VS Code / Android Studio
- Database: None (can integrate Hive, SQLite, Firebase)
- Package Manager: pub
- Version Control: Git + GitHub
- UI Tools: Flutter's Material Components
- Architecture: MVC

Project: Game App

Description: Bubble Trouble is a Flutter-based 2D action game where a player likely shoots or avoids bouncing balls using missiles or buttons. The project is still in early stages, but the file structure suggests a classic arcade-style gameplay with interactive elements.

Technologies & Tools Used :-

- Language: Dart
- Framework: Flutter
- Game Type: 2D arcade-style
- State Management: Basic (setState), can extend to Provider
- Editor: VS Code / Android Studio
- Storage: None (can add Hive/shared_preferences)
- Architecture: MVC
